

PERFORMANCE WITHOUT COMPROMISE

Frontier Managed WLAN

“Wireless” is everywhere

And yet...

Employees and customers are demanding not to have a controlled hotspot—but connecting wherever they are. Therefore, IT teams need to be able to onboard and manage thousands of diverse devices without creating headaches for users and the help desk, delivering consistent performance across every room.

Businesses need Wireless LAN

Retail

Everywhere

Hospitality

Education

Connectivity drives **GROWTH**

- Creating better customer experiences
- Enhancing mobility & employee productivity
- Simplifying management

What drives you?

Figuring out the why in WLAN

Simplicity

- The need to deliver connectivity without the hassle
- The desire to unify LAN & WLAN
- The obligation to have Zero-IT impact

Customer Centricity

- The need to provide better customer experiences, innovate and keep customers engaged
- The desire to offer high-performing wireless connectivity everywhere

Reliability

- The need for secure & reliable connectivity
- The policy to filter inappropriate content everywhere
- The mandate to limit and respond to threats as they happen

Reliably connect to the cloud?

Enhance communications?

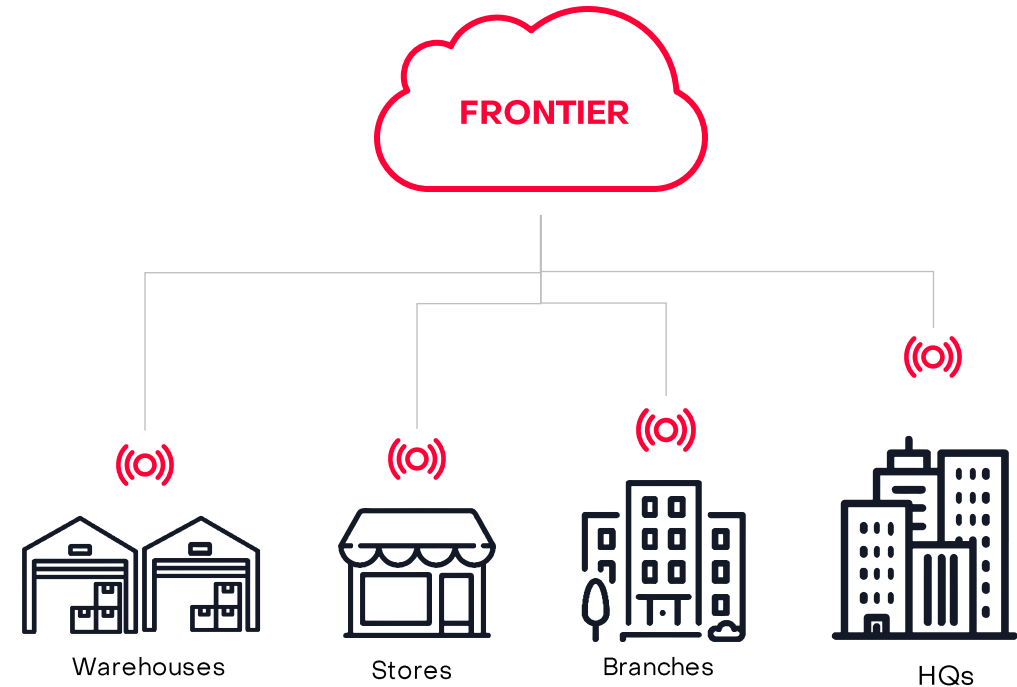

Securely connect your sites and datacenters?

Introducing Managed Wireless LAN

Centralized, cloud-based managed WLAN

A fully-managed Wireless LAN solution to seamlessly connect all your users and devices, and enable best-in-class wireless internet connectivity for customers, guests and staff, everywhere

- Easy to connect
- Indoor/outdoor access options
- Advanced Wireless security
- Business Intelligence portal

Turnkey & fully managed

Visibility, reliability & peace of mind

- No more struggling to manage separate networks for employees, collaborators, or guests —we handle it all, from design onward.
- No more dealing with spotty connectivity – we make sure you have a high-performing Wireless Network, 24/7

- Industry-competitive SLAs
-

- 24x7x365 Proactive Monitoring
-

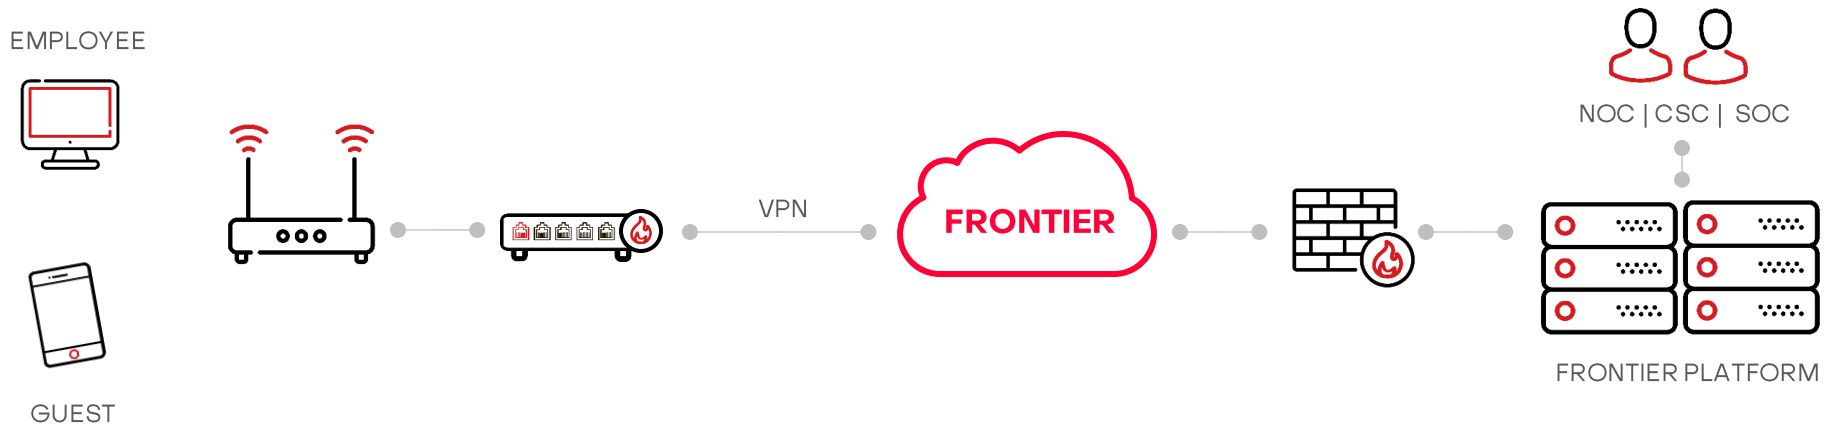

- Single point of contact for broadband & WLAN
-

- Advanced management options
-

- Three service options with no big capital expenditure upfront
-

- Simple contract

How it works

1. We design, install, and configure the WLAN solution
2. Our experts monitor performance
3. You enhance your experience with far less work and expense:

- Your branded network, with or without a password—your choice
- Customizable splash pages
- Fast, reliable, secure performance, powered by enterprise-grade technology

Managed WLA key features

High-density Areas

- Purpose-built Access Points
- Optimized for as many guests as you need
- Traffic shaping at the edge
- 802.11ac Wave 2 with MU-MIMO

On large Sites

- Centrally managing as many Access Points and switches as needed
- Deploying, managing, and troubleshooting quickly, remotely, and on-site if needed

Rapidly Growing...

- Highly scalable; add capacity without bottlenecks
- Available to deploy anywhere
- Paying only for what you need

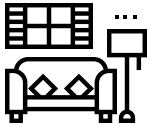

Optimizing bandwidth...

- Create identity, time and device-based policies
- Limit bandwidth hogging applications
- Manage users and devices

Three essential packages

Mix and match to build your ideal solution

Indoor

Perfect for low-density enterprise and hotspot environments, including midsize businesses, banks, real estate offices, retail locations, and restaurants

Hotel / Campus Dorms

Perfect for connected locations: sites where students / patients / customers with smart devices and other technology tend to gather

Outdoor

Perfect for RV Parks, transit hubs, stadiums, and other high-density outdoor venues

Combine, multiply & add components for a “Lego-like” Wireless LAN solution

WE KNOW CONNECTIVITY

We design, install and maintain Wired and Wireless networks, and the infrastructure that drives them

Uncompromised Connectivity

- **Purpose-built for agility & speed**

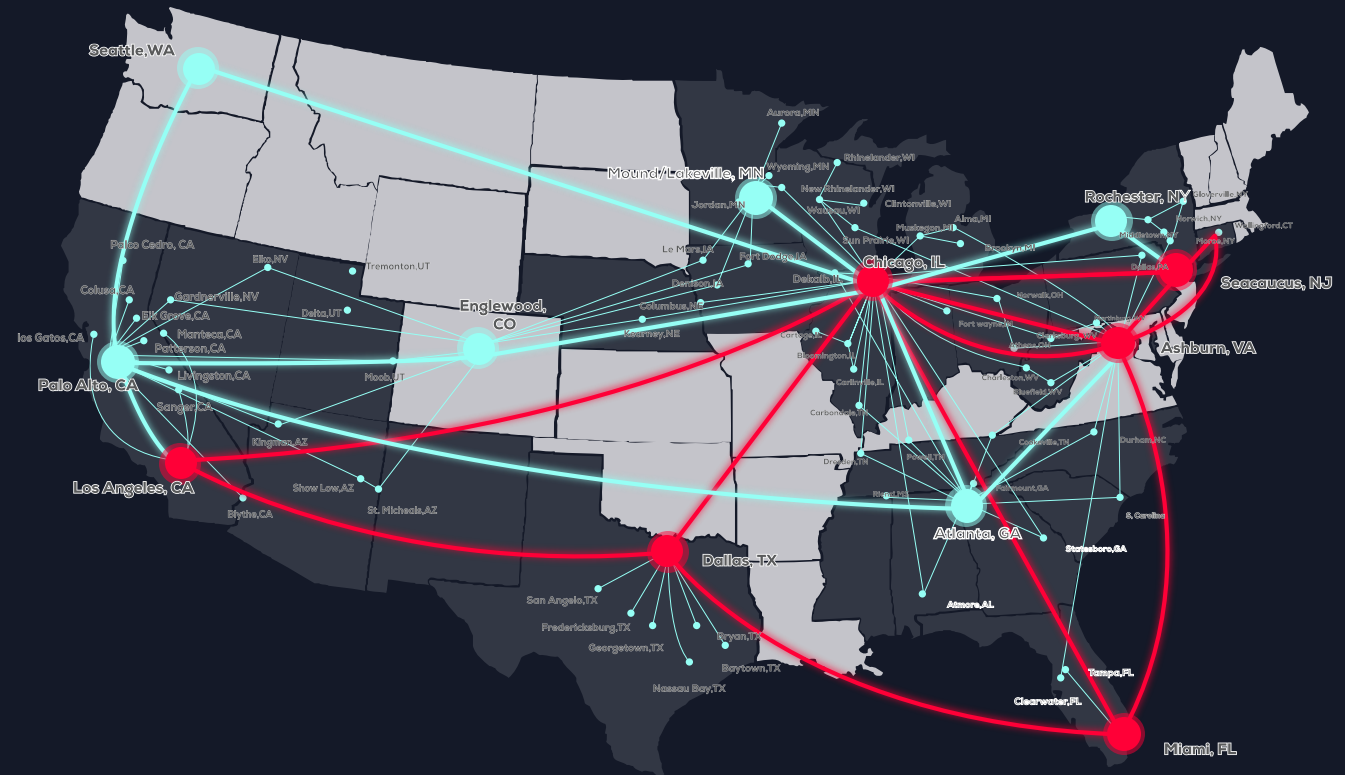

Road tested by 400,000 business clients. Delivering speeds of 10 Gbps and greater and SLAs that meets or exceed the industry's best.

- **Fault tolerant & secure**

Each year we make substantial investments to guarantee high-performance, security & continuity. Testament to that is our MEF2.0 certification

- **Available** anywhere

We own and operate an expansive fiber network sprawling 180,000 miles and reaching 25 states

“Wireless” Is Everywhere

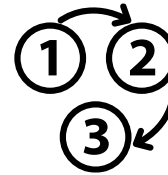

- **Available**
Technical experts at hand, ensuring effective delivery and timely support, with quality professional services to meet the needs of your business.
- **Proactive & Responsive**
More techs on footprint than any other network company. Proactive monitoring and support, 24/7/365, through three regional Network Operations Centers and four Customer Support Centers.
- **Transparent**
We follow industry best practices, and adhere to our committed SLAs..
- **Proven**
With 80 years of experience, we know how to thrive in a *fluid* marketplace

We are currently 3rd in active MEF Certified Professionals globally. This professional-level certification underscores our team's ability to implement and manage complex network solutions.

It's easy to make the switch

Simplify your network with
Frontier Managed Wireless LAN
